2621

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim (US 6,754,435 B2).

Regarding Claim 1, Kim teaches a display system embedded in an on-screen display (OSD) of a video player comprising:

- an access module for providing a medium signal (Fig. 9, 5; Col. 4, lines 41-44), the medium signal including a video signal and a subtitle signal (Col. 4, lines 31-61), wherein the video signal represents a video frame on a display (Fig. 14);
- an OSD module that can receive an input data to generate a corresponding information video signal (Fig. 9, 9; Col. 4, lines 54-57; Col. 2, lines 25-37), the information video signal representing an information frame on the display (Col. 4, lines 54-57), the input data being generated by a status signal received from a control module (Fig. 9, 11), the control module controlling the operation of the player and generating a corresponding status signal based on the operation of the player (in at least Col. 4, lines 52,53);
- a coding module for mixing and coding the video signal and the information video signal into a display signal (Fig. 9, 6; Col. 4, lines 55-58), the display signal representing a full frame on the display as the video frame overlapping the information frame (Col. 4, lines 54-57; Fig. 14); and

Art Unit: 2621

- a parsing module (Fig. 9, 5) for generating a text signal according to the subtitle signal and transmitting the text signal to the OSD module (Fig. 9; Col. 4, lines 40-43) to make the text signal an input signal of the OSD module (Fig. 9, 9).

Regarding Claim 2, Kim teaches the display system of claim 1 wherein the display signal includes at least a visible data and at least an invisible data, the visible data being displayed on the display for viewers (Fig. 14), the invisible data not being displayed on the display (Fig. 12, start and end addresses of VTS), and the coding module mixes and codes the video signal (Fig. 9, 6; Col. 4, lines 55-58) and the information signal into the visible data (Fig. 9, 9; Col. 4, lines 54-57; Col. 2, lines 25-37) so that the display signal represents the full frame on the display as the video frame overlaps the information frame (Fig. 14).

Regarding Claim 3, Kim teaches the display system of claim 2 wherein the subtitle signal includes a control signal and a caption signal (Col. 4, lines 31-61), the control signal controlling the text signal to be coded in the format of invisible data (Col. 4, lines 55-57), and the parsing module (Fig. 9, 5) parses the caption signal within the subtitle signal to generate a corresponding text signal (Fig. 9 – A/V processor to output via mixer with Overlay; Col. 4, lines 40-43).

Regarding Claim 4, Kim teaches the display system of claim 1 embedded into an optical player (Fig. 9), and the access module provides the medium signal based on the data of an optical disk (Fig. 9; Col. 4, lines 31-36).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P. Choi whose telephone number is (571) 272-9594. The examiner can normally be reached on Monday - Friday 8:00AM - 5:30PM (EST).
